PROFILE

Software Engineer | .NET Core, Python, FastAPI & Enterprise Solutions

Highly skilled .NET Core Developer with solid experience designing, developing, and maintaining secure, scalable, and high-performance applications. Proficient in C#, ASP.NET Core, REST APIs, SQL databases, React, and Docker, I bring a holistic understanding of both backend development and system infrastructure.

I specialize in building enterprise-grade solutions that are efficient, secure, and aligned with business needs. My broad IT background across application development, DevOps (IIS, NGINX, Docker), cloud platforms (Azure, AWS), and IT Security enables me to deliver software that performs reliably in real-world environments.

Focused on delivering reliable software solutions that improve operational efficiency, user experience, and business outcomes.

TECHNICAL SKILLS

- Languages: C#, Python, JavaScript, SQL, HTML, CSS
- Frameworks: ASP.NET Core, .NET Framework, Entity Framework Core, React.js, FastAPI
- Databases: Microsoft SQL Server, PostgreSQL, MySQL
- Tools and Platforms: Docker, GitHub, IIS, NGINX, Visual Studio, Postman
- Concepts: RESTful APIs, Object-Oriented Programming (OOP), Microservices Architecture, IT Security
- Other: SEO, CMS (WordPress), Cloud Platforms (Azure, AWS), Server C VM Management
- AI & Automation: LangChain, LangGraph, CrewAI, Grok API

WORK EXPERIENCE

Application Developer (.NET Core / C# Developer)

Jubilee-Life Mortgage Bank, Lagos | Sept 2023 – Present

- Lead development and deployment of banking and internal enterprise applications built on .NET Core, Blazor, React, and SQL Server.
- Collaborate directly with business stakeholders to gather requirements, scope technical

solutions, and ensure system alignment with operational needs.

- Designed and implemented secure RESTful APIs that improved internal system integration and reduced manual processing by 80%.
- Oversaw code quality reviews, documentation, and CI/CD pipelines to maintain technical standards.
- Deployed and maintained Azure-hosted applications, ensuring high availability and security compliance.
- Managed IIS and NGINX configurations for production deployments.
- Mentored junior developers and led peer reviews to improve code maintainability and team knowledge sharing.
- Participated in strategic IT meetings to align development roadmaps with business objectives.

.NET s Frontend Developer

Javaplus Innovation, Lagos | Oct 2022 – Jun 2023

- Designed and developed ASP.NET Core and Blazor applications with responsive UI and modular components.
- Integrated frontend (Razor/React) interfaces with backend APIs for real-time data handling.
- Worked closely with product managers and external partners to define scope and deliver milestones on time.
- Improved software reliability and user experience through refactoring, debugging, and performance optimization.
- Delivered SEO-optimized WordPress hybrid systems integrated with .NET APIs.

.NET Support Developer / IT Systems Engineer

American Employee Recreation Association, Lagos | Aug 2021 – Sept 2022

- Supported the development, deployment, and maintenance of internal .NET applications and APIs.
- Assisted in configuring and managing IIS servers for .NET project hosting and deployment. Collaborated with developers to test, debug, and document backend services and integration points.
- Wrote utility scripts and minor C# modules to automate support tasks and improve system reliability.

- Participated in API testing and performance monitoring using Postman and SQL queries.
- Provided tier-2/3 technical support for application users, resolving issues related to .NET and database operations.
- Documented configurations, deployment procedures, and troubleshooting steps for development teams.

INDEPENDENT PROJECTS

Designed and developed a multi-agent AI framework for automating data migration and validation in core banking systems.

- Built intelligent agents capable of schema analysis, data mapping, transformation, validation, and integrity verification across heterogeneous databases.
- Leveraged LangGraph, CrewAI, Pandas, and PostgreSQL to orchestrate agent workflows and ensure migration accuracy.
- Focused on reducing manual migration effort while improving consistency, traceability, and data quality.
- Enterprise Banking Migration Toolkit | Python, PostgreSQL
- Developed database migration utilities for extracting, transforming, and validating banking data between legacy and modern systems.
- Built reusable ETL workflows for schema comparison, field mapping, and automated data quality checks.
- Implemented reconciliation and reporting capabilities to improve migration transparency and accuracy.

BeProductive Suite API | Python, FastAPI, PostgreSQL

- Designed and developed a productivity management platform to help users plan goals, manage tasks, track progress, and maintain accountability.
- Built secure RESTful APIs using FastAPI with JWT authentication, role-based access control, and interactive OpenAPI documentation.
- Implemented AI-assisted planning and coaching features using the Grok API to support task organization and productivity improvement.
- Integrated automated email reminder workflows and performance tracking capabilities to encourage consistency and goal achievement.
- Deployed the platform using Render, Vercel, Neon PostgreSQL, and Brevo email services.

LEADERSHIP & COMMUNITY

Women in Tech Lead | Lagos Chapter

- lead mentorship initiatives, technical workshops, and community programs supporting women pursuing careers in technology.
- Promote technical growth, career development, and knowledge sharing within the community.

EDUCATION

- Miva Open University, MSc Software Engineering | 2026
- Melodia Academy – Software Engineering | 2021
- ALX Africa – Backend Development | 2021
- SheCode – Frontend Development | 2020
- University of Nigeria – BSc Integrated Science | 2021
